covering assignment. As spirits plunged, other units fought less well, or simply ran away.

The March 19 ambush of an armored convoy on the road set panic in motion. Tanks, engineer equipment, and artillery howitzers were abandoned. Helicopter gunships were desperately called in to destroy the vehicles before they fell into North Vietnamese hands. The Vietnamese armor was too restricted by terrain to maneuver adequately, and suffered the devastating consequences. The next day U.S. fighter-bombers, B-52 strategic bombers, and helicopter gunships made thousands of sorties into the skies to lend all possible support. One battalion of the 2d ARVN Regiment was lifted out, but twenty-eight of the forty helicopters were damaged in its extraction. Plans to lift out another regimental battalion were aborted when the first helicopter was exploded making the approach.

The VNMC battalions were hanging on to several fire bases by their fingernails, and only the heroics of Army helicopters of the 14th Aviation Battalion kept them supplied with ammunition. Route 9 was now littered with abandoned vehicles, and the fleeing armored force had to break jungle to get back into Vietnam. The "elite" ARVN Airborne Division, the showpiece of Vietnamization, performed so miserably that it not only lost key fire bases, but utterly failed in its flank security mission on the way out. The Vietnamese Marines abandoned several critical areas after halfhearted resistance, and were unable to control their elements. Panic seized several marines and paratroopers defending bases to the rear, and Army helicopters became mobbed.

Only the bold, decisive use of American air power enabled the South Vietnamese forces to reach Tchepone and get back. Helicopters provided cover overhead, resupplied ammunition, and retrieved survivors by flying through a wall of flak. In the process, ninety-two aircraft were lost and over six hundred damaged. Twenty-five Commando Vault bombs were used to break up NVA troop concentrations and to cut landing zones.

For the Saigon regime, the projected victory of LAM SON 719 turned out to be a sour defeat, exposing grave deficiencies in planning, organization, leadership, motivation, and operational expertise. The absence of calm, reasoned leadership can-

WASHINGTON, D.C.

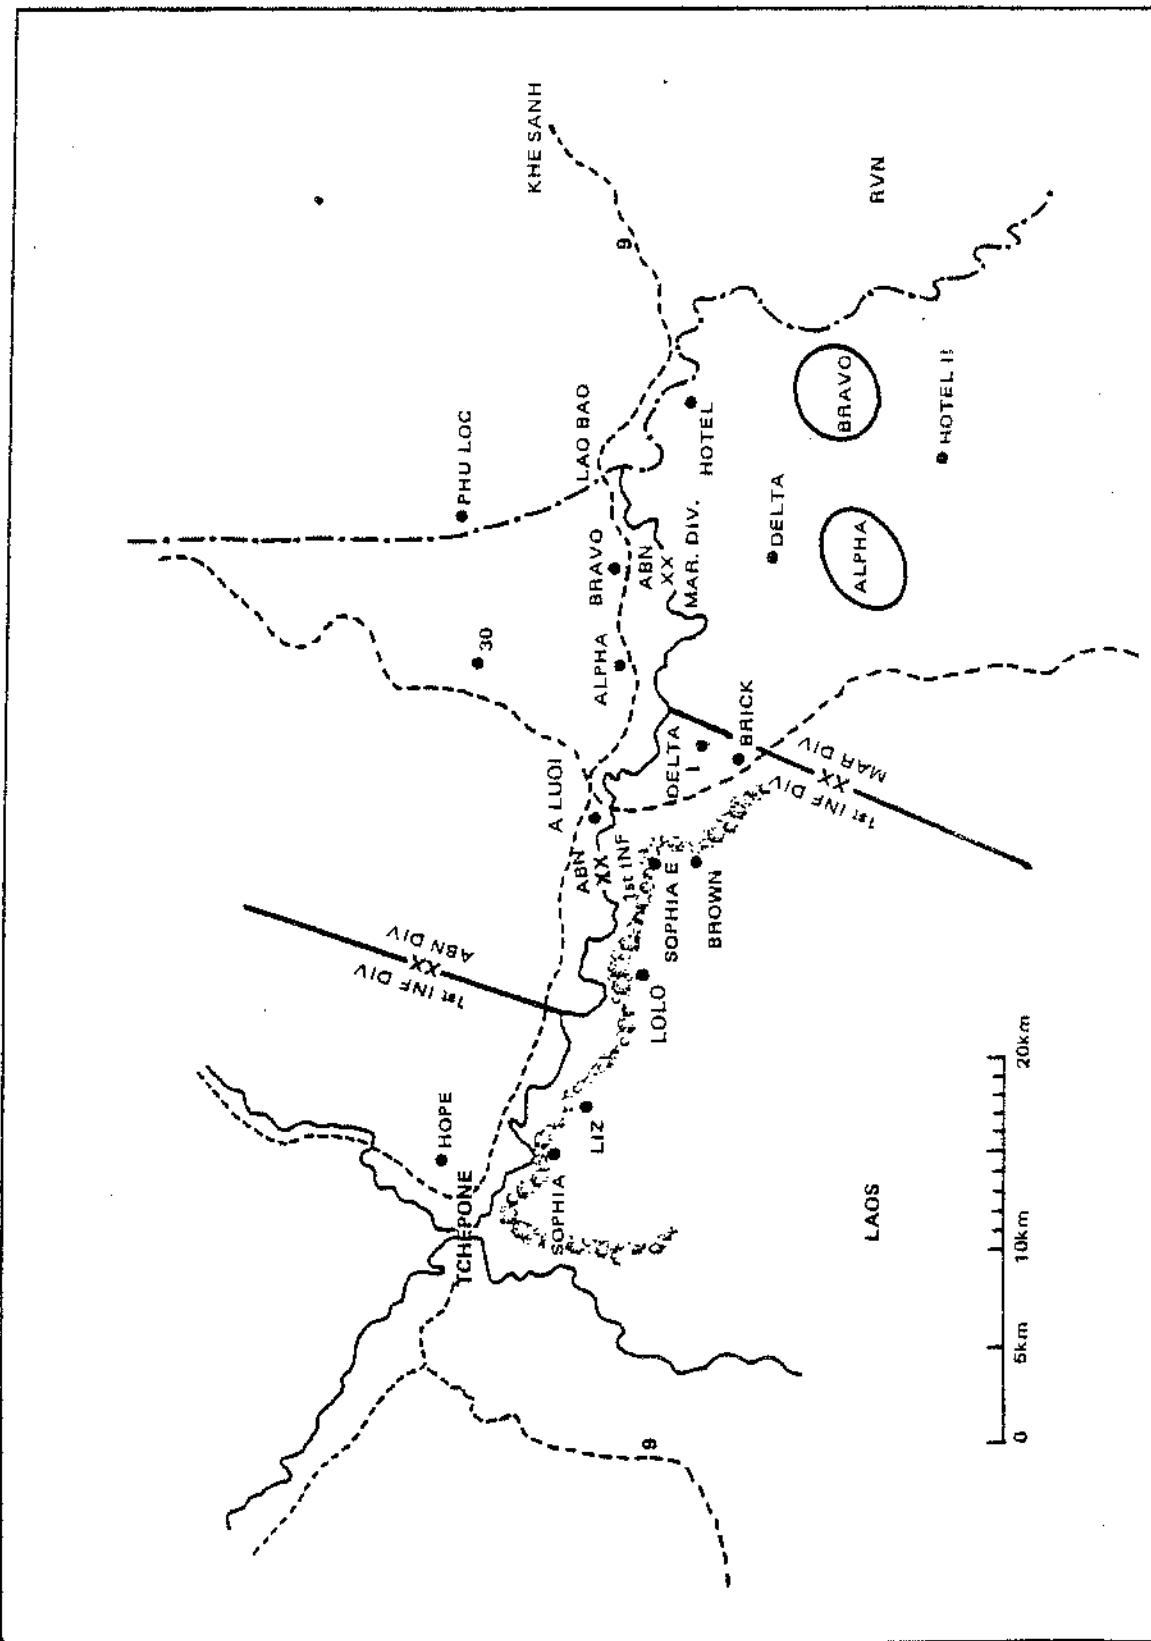

the remaining 43 armored wounded. Cumulative enemy losses for the period from 25 February to 3 March throughout the lower Laos area of operation were 1,536 killed. These losses amounted to about one regiment per week.

While the enemy endeavored to annihilate Fire Support Base 30 and the 17th Armored Task Force, the relief plan was being carried out, marking the beginning of a new offensive phase. (Map 20) Between Fire Support Base A Luoi (Ban Dong) and the border, the Airborne Division set up two fire support bases, Alpha and Bravo, to consolidate the security of Route No. 9. The 1st Ranger Group with its remaining two battalions (21st and 37th) was deployed northwest of Khe Sanh and provided security for Fire Support Base Phu Loc. The 369th Brigade, kept in reserve by the corps, conducted security operations south of Khe Sanh.

On 2 March, the 7th Marine Battalion, 147th Brigade, began landing troops in Fire Support Base Delta. The 2d Battalion of the 3d Regiment, which had suffered from combat attrition at Hotel 2, was sent to the rear to reorganize while other elements of the regiment moved out to operate in the areas of Delta 1 and Brown. For three consecutive days, the 147th Brigade Headquarters and the remaining 2d and 4th Battalions were inserted into Delta. Immediately thereafter, the 2d and 4th Marine Battalions moved out to operate in the area of objective Alpha. The entire 258th Brigade, meanwhile, was inserted at FSB Hotel. The 8th Battalion assumed security of the base and operated in the Co Roc area while the 1st and 3d Battalions searched for the enemy in the area of objective Bravo. Marine activities during this time resulted in 361 enemy killed and 51 weapons seized. Also, 153 enemy personnel killed by airstrikes were found by marine troops.

On 3 March, in execution of the plan to enter Tchepone, the 1st Battalion of the 1st Infantry Regiment was inserted at Landing Zone Lolo 13 kilometers southeast of Tchepone. The landing had met with strong enemy opposition and had been postponed twice because of additional preparations required for the landing zone. The 1/1 Battalion finally touched ground at the price of 11 helicopters shot down, 44

Map 20 – The Attack Toward Tchepone

others hit by gunfire and two D4 bulldozers destroyed after being dropped from the air. The following day, the 1st Regiment Headquarters, the 2/1 Battalion and a battery of 105-mm howitzers were brought into Landing Zone Lolo. Fire Support Base Lolo was thus established. The 4/1 Battalion meanwhile landed at Landing Zone Liz, six kilometers west-northwest of Lolo.<sup>7</sup> The various units then moved out to search the area but only a few light contacts were made with minor results.

In the morning of 5 March, in order to continue its westward push, the 2d Infantry Regiment of the 1st Division was scheduled to occupy Landing Zone Sophia, four-and-a-half kilometers southwest of Tchepone at 1100 hours but unexpected bad weather delayed the operation. After preemptive airstrikes, at exactly 1320 hours five UH-1Hs landed safely. Sporadic gunfire was received but posed no major threat. By nightfall, Landing Zone Sophia had eight 105-mm howitzers in position with adequate ammunition. Searching further out the 4th and 5th Battalions found the bodies of 124 enemy troops and seized 43 AK-47s, nine 12.7-mm machineguns, four RPD automatic rifles, nine B-40 rocket launchers, three radios, military clothing, equipment and food supplies. After securing Fire Support Base Sophia, the 2d Regiment was now in a position to control Tchepone from its mountain base and keep the areas surrounding the town within range of its artillery.

---

<sup>7</sup> English names were chosen for objectives, firebases and the like primarily to facilitate communications with U.S. support units. During the First Indochina War, the French had followed a parallel practice (at Dien Bien Phu, for example). Perhaps feminine names were selected to bring some softness into the virile world of combatants at war. "Lolo", "Liz", and "Sophia" were chosen by Colonel Vu Van Giai, the very effective deputy commander of the 1st Division who assisted in maneuvering the division during this period. He had served for several years in the DMZ area, in coordination with U.S. combat units, and he naturally followed their practice in naming firebases. The small return that the NVA might have enjoyed by exploiting these names for propaganda value—as proof that the Americans were still in charge despite Vietnamization—was certainly overridden by the practicality of having words the Americans could understand and pronounce.

For the next two days, throughout the areas of operation of the 1st Infantry and the Marine Divisions, friendly units caught the spirit of the new offensive. They fought aggressively, repeatedly engaged the enemy, and defeated him everywhere. In the morning of 5 March, in the area of Objective Alpha, the 4th Marine Battalion killed 130 enemy troops and seized 25 assorted weapons including two 82-mm mortars. Friendly forces sustained six killed and 42 wounded. The 4/1 Battalion made contact near Landing Zone Liz, killing 41 Communist troops and seizing 15 weapons along with two mortars. By 6 March, engagements were increasing and occurring everywhere, but friendly forces suffered only light casualties while inflicting heavy losses on the enemy. More importantly, they were now within easy reach of Tchepone, the final objective that President Thieu had ordered them to take just three days earlier.

In the afternoon of 6 March, Khe Sanh received an attack by fire of an estimated 22 rounds of 122-mm rockets and two U.S. troops were killed and 10 wounded. Elsewhere, the enemy appeared to take no significant initiative but he was increasing his use of surface-to-air missiles in lower Laos. Earlier, on 2 February, a Mohawk aircraft flying west of the demilitarized zone reported an unidentified missile fired from the ground which exploded approximately 100 meters away, causing no damage to the aircraft. Subsequently, 14 instances of surface-to-air missile firing were photographed or reported by forward air controllers, army pilots, tactical air and reconnaissance aircraft. Missile transportation equipment and antenna vans along with other equipment related to surface-to-air missile systems were also sighted in the tri-border area.

The day selected to enter the ultimate objective, Tchepone, was 6 March. A total of 120 U.S. helicopters were assembled to carry out the assault. In addition to B-52, U.S. tactical air strikes or air cover sorties were scheduled every 10 minutes. Elements of the 2/17 U.S. Air Cavalry reconnoitered targets, prepared landing zones and covered the assault. An enemy attack by fire on Khe Sanh Base forced the huge assemblage of U.S. helicopters to depart 90 minutes earlier

than planned, but preparations for this operation had been so carefully executed that when the first helicopters carrying the 2/2 Battalion landed at Landing Zone Hope four kilometers northeast of Tchepone, only sporadic gunfire was received. By 1343 hours both the 2d and 3d Battalions along with an element of the 2d Reconnaissance Company and the tactical command post of the 2d Infantry Regiment had landed safely at Hope. Searching the adjoining areas and occupying key positions, the 2d Regiment only made light contacts but found the bodies of 102 enemy troops killed by B-52s and seized five 12.7-mm machineguns and one anti-aircraft artillery gun. Extending its search further south toward Tchepone, the 3/2 Battalion found a cache of an estimated 1,000 tons of rice and 2,000 gas masks along with 31 enemy bodies and numerous weapons destroyed by B-52s. Nearby, the 2/2 Battalion found an area devastated by B-52s with nearly 100 enemy bodies and assorted weapons shattered to pieces. After the two reinforced ARVN battalions had made assault landing near the objective and rapidly exploited their success, the district town of Tchepone was practically under ARVN control, dominated as it was by the array of artillery pieces to the south. The most remote terrain objective of LAM SON 719 was attained.

in pursuit, all the while rejecting the NVA demands for it to surrender.

On 17 March, close to the banks of the Tchepone River, the battalion was intercepted and the fighting lasted all day, with tactical air and gunships providing dedicated support. The battalion commander and his deputy were both killed. Most of the company commanders and officers of the battalion were also killed and the few survivors managed to escape to an area near Route No. 9. There, in the late afternoon of 18 March, U.S. helicopters with tactical air support conducted a daring rescue. Three helicopters were hit and one fighter-bomber exploded in the air but the thirty two survivors of the 4th Battalion were rescued and flown to the rear.<sup>2</sup> The battalion had accomplished well its rear guard mission and in the process, had sacrificed nearly every man. The fight put up by Fire Support Base Lolo and the units of the 1st Infantry Regiment had resulted in 1,100 enemy killed, causing severe losses to two main force regiments of the Communist NT-2 Division.

*"Lock Its Head, Grip Its Tail"*

While the 1st Regiment was subjected to heavy attacks which eventually caused it to pull out of the Lolo area, the battalions of the 2d Regiment continued to conduct reconnaissance in force and search the Cua Tung and Cua Viet objective areas along Route 914. In three areas, approximately one-and-a-half, six and seven kilometers southeast of FSB Sophia East, the 2d and 3d Battalions found many logistical installations and camps destroyed along with decomposed bodies of enemy troops. Supported by helicopter gunships, they destroyed five enemy trucks.

In the southeast, activity in the Marine sector began to pick up. The 147th Marine Brigade Headquarters at Fire Support Base Delta received 400 incoming rounds which killed eight marines. The 7th

---

<sup>2</sup> The next day, additional troops managed to reach safety. The reported strength of the 4th Battalion on 19 March was 82 men.

Battalion, operating outside the base, received a corresponding number of artillery rounds and had five wounded. Other units of the brigade, the 2d and 4th Battalions, continued to search objective area Alpha, approximately five kilometers south of Fire Support Base Delta.

During the afternoon of 16 March the headquarters of the 3d Infantry Regiment (1st Division) and its 4th Battalion were picked up in the Delta 1 area and taken to Ham Nghi Base along with a number of supporting units. The 3d Battalion had been taken out for rest and reorganization two days before. The 1st Battalion remained to secure the base (Delta 1).

Meanwhile, the enemy was beginning to harass Khe Sanh. For the second day running, this fire support base was hit by mortar fire which wounded four Americans and damaged two helicopters and a number of vehicles.

On 17 March, Communist gunners stepped up their shellings of other targets. In RVN territory, at the border, Fire Support Bases Phu Loc and Lao Bao were attacked by 130-mm artillery but the losses were small.

Fire Support Base A Luoi received attacks by fire practically every day and Fire Support Base Delta and the 7th Marine Battalion were pinned down. In a small engagement, the 7th Battalion killed 16 enemy troops while suffering only five casualties. A NVA recruit just assigned to the 812th Regiment, 324B Division rallied to the Marines and disclosed that the entire 324B Division was in the "Route 9 campaign" with its 29th, 803d and 812th regiments. The 29th Regiment had recently suffered heavy losses and the 812th Regiment was engaging the 147th Marine Brigade.

In the meantime, in the area of the 2d Regiment, the 5th Battalion received an intense early morning attack of an estimated 300 rounds of mortar and artillery fire. The battalion continued its search operations and, thanks to intensive air support, scored a major victory in the area near Landing Zone Brown, killing nearly 100 enemy and capturing a large number of weapons and a ton of ammunition. In accordance with the withdrawal plan, the headquarters of the 2d Infantry Regiment was

evacuated to Delta 1 while its battalion proceeded east on foot.

From 18 March on it seemed that the enemy was well aware of the ARVN withdrawal and there were signs of the enemy concentrating a regimental size unit northwest of Fire Support Base A Luoi while pressure increased around Fire Support Base Delta of the 147th Brigade. The base began to receive fire from 130-mm field guns and NVA infantry had infiltrated close enough to fire at aircraft. There were about 10 antiaircraft guns positioned on the mountain slopes around the base that could not be silenced. The 2d and 4th Battalions operating to the south were recalled to sweep the area around Delta and to prepare for the withdrawal.

By mid-day of 18 March the 1st Infantry Regiment, with its 1st, 2d and 3d battalions, after falling back from the Lolo area, arrived in an area approximately 2,000 meters southwest of Fire Support Base A Luoi. There they were picked up by helicopters and flown to Khe Sanh. The survivors of the 4th Battalion were also flown back in the late afternoon. Next came the turn of the 5th Battalion, 2d Regiment, which boarded helicopters from an area adjacent to Landing Zone Brown.

Immediately thereafter, from about 1600 hours and continuing through the night of 18 March, the remaining three battalions of the 2d Infantry Regiment, the 2d, 3d and 4th, received heavy attacks west of the Brown area. The NVA followed up its artillery with ground assaults. The next morning the 4th Battalion made a preliminary report that it had 33 wounded and five missing. The 2d Battalion had similar casualty figures while enemy losses were unknown.

For four days now, reports flowed into I Corps headquarters of strong attacks that included very heavy bombardments by heavy artillery and tank attacks. Reports of ARVN losses, including the decimation of the 4th Battalion, 1st Infantry, were very disturbing to General Lam, as were the many indications that the enemy was reinforcing and maneuvering to prevent the orderly ARVN withdrawal from Laos. So, on the night of 18 March, General Lam called his division commanders to a conference at Ham Nghi Base (Khe Sanh) to hear their assessments and recommendations. They each recommended that disengagement proceed as quickly

as possible; General Phu, commanding the 1st Division, displayed anxiety for the first time in the campaign.

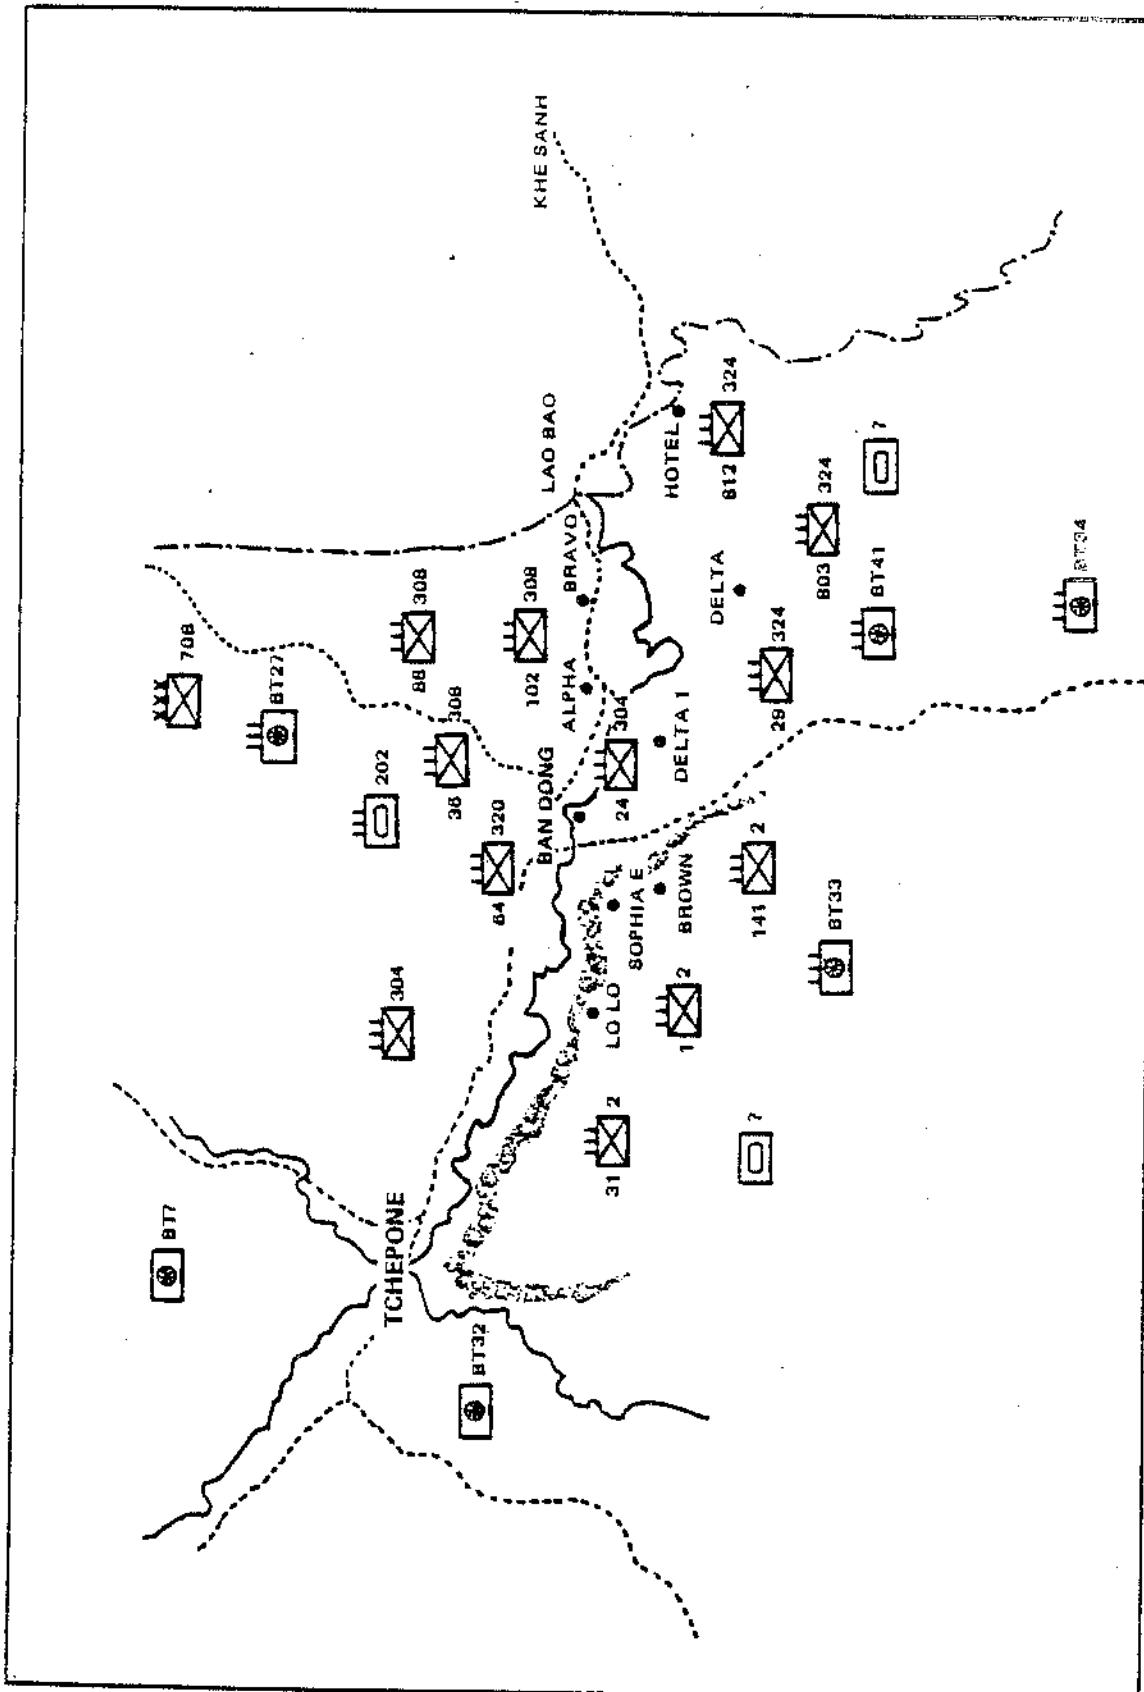

When the conference was over, General Lam ordered that the withdrawal proceed at a quicker pace and that preparations begin immediately for the extraction of the 2d Regiment from the Brown area and Fire Base Delta 1 where all its battalions were under heavy attack and in danger of being cut off and destroyed.

On the morning of 19 March, abandoning Fire Support Base A Luoi (Ban Dong), ARVN armored elements and attached airborne units moved overland to take positions along a line near Fire Support Base Alpha. The 2d Airborne Battalion operating to the north and having made a contact with the enemy during the day, would be helilifted from a landing zone north of Base Alpha. After the elements from Ban Dong had arrived at Alpha, the remaining forces of the 1st Infantry Division were also picked up, including the battalions of the 2d Regiment from the Brown area and the 2d Regiment Headquarters along with the 1st Battalion, 3d Regiment from Base Delta 1.

Information received during the night added some clarity to the situation. Almost all the airborne battalions were in contact with the enemy. The 7th, 8th, 9th and 11th Airborne battalions had relatively light engagements with minimal losses on both sides. The 1st Airborne Battalion, however, had 18 casualties and reported killing 80 enemy troops, capturing five prisoners and seizing five AK-47 rifles. The 2d Airborne Battalion also suffered relatively high losses, with 18 killed and 57 wounded. Enemy losses were unknown. On the Marine side, Base Delta was still experiencing heavy enemy pressure. The 7th Marine Battalion constantly received attacks by fire and ground attacks. The enemy even used a noxious gas but suffered heavy casualties with 42 killed. Marine losses were light.

The 19th of March was a day of intense activities. All ARVN units in Laos reported enemy contacts. A synthesis of information received from prisoners, ralliers and the combat units gave a rather clear picture of enemy dispositions on the battlefield. The 308th NVA Division with its 36th, 102d and 88th regiments was attacking from the north. (Map 22)

Map 22 – Enemy Situation, Late March 1971

The 64th and 24th Regiments (respectively from the 320th and 304th Division) continued to encircle the Ban Dong area east of Route No. 9. The 2d Division was trying to annihilate the remaining forces of the ARVN 1st Infantry Division. The 324th Division deployed its 29th and 803d Regiments to attack the 147th Marine Brigade while its 812th Regiment pinned the 258th Marine Brigade down around Hotel and at Co Roc. The enemy apparently wanted to catch the entire ARVN force in his trap. In the manner of a hunter, he set about to kill his prey by "locking its head and gripping its tail." This was his strategy of annihilation for which he had coined this metaphorical phrase.

In the RVN territory, all Communist main and local force units stepped up their operations. Mine attacks and ambushes occurred daily on the LOC, Route No. 9. Enemy sappers continually probed logistical installations and the enemy launched a psychological warfare campaign aimed at publicizing the NVA victories along Route No. 9.

Beginning in early morning, north of Ban Dong, the 8th and 9th Airborne Battalions were under attack. The 8th Battalion had 32 casualties while the 9th Battalion immediately to the east inflicted heavy losses on the enemy. Only light engagements were reported along Route 9 while Ban Dong Base began to be evacuated after most of the artillery pieces had been lifted out by helicopters.

The armored logistic convoy set out, towing damaged vehicles and guns under the protection of airborne units and other armored elements while the enemy continued to exert pressure on the rear of the column. At 0730 hours, approximately two kilometers north of Ban Dong, forward air controller aircraft reported sighting four enemy tanks moving down. Approximately four kilometers east of Ban Dong Base, the logistic convoy was ambushed and all 18 vehicles were immobilized. Some of the lead vehicles were hit by direct fire and destroyed. The road had only one lane; the vehicles behind were stalled in the ambush zone. While the battle was in progress no reports were received from the convoy commander; his superiors were therefore unaware of what was happening to the convoy. Losses incurred during the ambush were neither reported nor even analyzed afterwards. According to reports from an observation

plane, four M-41 tanks and three M-113 APCs, each towing a 105-mm howitzer, were apparently damaged among the 18 stranded vehicles. Road security for the movement of this convoy was the responsibility of armor and airborne units but during the attack, the convoy never initiated any request for air support or gunships. Apparently the ambush caught the convoy by surprise and it ended as quickly as it began. Later the commander of the 1st Armored Brigade requested tactical air to destroy the ambushed vehicles and his request was immediately granted in order to prevent the enemy from capturing usable equipment.

On the front manned by the Marine Division, the situation was even more serious. The units of the 258th Brigade were increasingly engaged by the enemy and the encirclement of Fire Support Base Delta did not relax in any way. Supplies could not be delivered and the 2d and 4th Battalions were intercepted on their way to the relief of the base. Inside the base, five of the ten 105-mm howitzers were out of action due to enemy fire and the number of marines killed and wounded kept increasing.

In the area of the 1st Division, Fire Support Base Delta I was hit by numerous 122-mm rockets and 75-mm recoilless rifle rounds which put four 105-mm howitzers out of action and caused 1,400 rounds of 105-mm ammunition to explode. The 2, 3d and 4th Battalions of the 2d Infantry Regiment west of Sophia East were involved in skirmishes throughout the day.

Late afternoon saw the enemy attack more fiercely and tactical air as well as C-130 gunships were called in to provide support. By midnight all three battalions reported having consolidated their positions. The 3d Battalion had 47 casualties after killing 87 Communist troops and seizing 49 AK-47s and 17 grenade launchers. Among the enemy bodies were those of two company commanders of the NVA 2d Division. The 2d Battalion had light casualties but reported killing 85 enemy, seizing 47 AK-47s and several other crew-served weapons. The 4th Battalion reported killing 195 enemy troops and seizing 59 AK-47s and numerous other weapons.

During the day, U.S. air support substantially increased, with 686 sorties of helicopter gunships, 246 tactical air sorties and 14 B-52 missions which dropped 1,158 tons of bombs.

Late in the afternoon of 19 March, Ambassador Bunker and General Abrams were received by President Thieu. President Thieu disclosed he had directed a cautious withdrawal which would be completed from 5-8 April. When the withdrawal was complete, he planned to have about three battalions launch a raid against Muong Nong, the center of Communist Base Area 611, and wanted strong U.S. air support for this raid.

On 20 March, the U.S. Air Force and Army helicopters exerted their maximum effort, with 1,388 gunships sorties, 270 tactical air strikes and 11 B-52 missions dropping 909 tons of bombs. Around 1300 hours, the 3d Battalion, 2d Regiment was extracted from the area west of Sophia East by U.S. Army helicopters which flew through heavy antiaircraft fire to evacuate it to Ham Nghi Base. In the process, 28 of the 40 helicopters involved were hit. Plans for the extraction of the 4/2 Battalion were subsequently aborted because the first helicopter attempting to land was hit by fire and exploded in the air. Before nightfall, the artillery pieces at Fire Support Base Alpha along with the 2d and 7th Airborne Battalions were transported back to Vietnam. Plans provided for the 2d and 4th Battalions, 2d Regiment, to be picked up the next day, followed by the regimental headquarters, its artillery, and the 1st Battalion, 3d Infantry from Fire Support Base Delta 1. The two 2d Regiment battalions were ordered to find a more secure pick up zone.

In the meantime, the 1st Armored Brigade, reinforced by the 7th and 8th Airborne Battalions, had arrived at Phase Line Alpha the preceding evening. The armored and airborne elements deployed to provide security for Route No. 9 from Alpha to Base Bravo. At 2100 hours the NVA attacked the 8th Airborne Battalion and 11th Armored Cavalry Squadron south of Alpha but were repulsed with heavy losses.

Around Fire Support Base Delta of the 147th Marine Brigade, on this same day, Communist suicide troops reached the defense perimeter and dug in. Small arms fire from these pockets made helicopter landings and takeoffs even more difficult. Supply deliveries could not be made but the 7th Marine Battalion and the troops of the 147th Brigade held on because they had previously received a ten-day reserve of supplies which would permit them to continue fighting.

On 21 March, at 0300 hours enemy action became intense in the area to the west, where the 2d and 4th Battalions of the 2d Regiment were stranded two kilometers east of Sophia East. The Regiments of the NVA 2d Division were determined to attack and annihilate these two battalions but they were not successful. In the process, the enemy lost 245 killed, 52 B-40s and B-41s, seven machineguns, seven 60-mm mortars, five 82-mm mortars, eight flame throwers, nine 12.7-mm machine-guns and 65 AK-47s. Friendly losses were 37 killed, 58 wounded and 15 missing. This ARVN victory caused enemy pressure to relax and the remaining forces of the 1st Infantry Division were transported by U.S. helicopters to Ham Nghi Base before nightfall. Meanwhile, the headquarters of the 1st Airborne Brigade, the 5th Airborne Battalion and the troops of the artillery unit left at Fire Support Base Alpha were also safely evacuated south. Fire support bases Alpha and Delta 1 were thus closed on that day and ARVN forces pulled back near Fire Support Base Bravo, five kilometers west of the RVN border.

The situation in the areas manned by the 1st Infantry and the Airborne Division had been resolved but, over in the Marines' area, there was an eruption of fire. The 29th and 803d Regiments of the 324B Division were determined to destroy Fire Support Base Delta. These two enemy units began attacking fiercely at dawn of 21 March. Mortar and direct artillery fire (the latter believed to come from tank guns) was very accurate. All 175-mm guns from the RVN side of the border were mobilized to provide close fire support to the Marines. In the morning, 13 tactical air sorties provided additional support. A B-52 mission was diverted to the area and crushed an enemy battalion (a PW later reported this battalion had lost 400 men from this B-52 action). The attack was checked and the base held firm. A casualty count showed that the Marines had 85 killed, 238 wounded and 100 weapons damaged while enemy forces suffered 600 killed, five detained and an estimated 200 individual and 60 crew-served weapons seized. After the battle, the 147th Brigade and the 7th Marine Battalion ran short of supplies. Thanks to air support, seven U.S. UH-1H helicopters were able to land, bringing ammunition and evacuating wounded. These helicopters were

able to return to their base but all bore battle scars. An eighth helicopter was shot down.

During this period the enemy greatly increased his interference and jamming of our radio communications. Several frequencies were so badly jammed that communications became impossible. In many instances, enemy radio operators argued and exchanged insults with ours. These heated verbal exchanges occurred most frequently when the enemy intensified his attacks against the marines. To return the courtesy, our operators also intercepted and jammed enemy radio frequencies. During one of these interceptions, marine operators overheard a female voice giving combat orders. In general, South Vietnamese units did not make enough effort to safeguard radio communications security, often using the most rudimentary of self-devised code systems. This episode of reciprocal interference and jamming was perhaps more damaging to our side than to the enemy who was usually more disciplined. The extent of this damage, if any, could never be ascertained because of the intense fighting.

In the morning of 21 March, Vandegrift logistical base was penetrated by Communist sappers and 10,000 gallons of aviation fuel exploded into flames. Along Route No. 9, near Fire Support Base Bravo, the 11th Armored Cavalry Squadron and 8th Airborne Battalion were heavily engaged. There were nearly 100 casualties while four M-41 tanks and 13 armored personnel carriers were damaged. This battleground looked forlorn after the attack, with damaged vehicles abandoned and scattered across the road, making passage extremely difficult.

During the day, U.S. air support remained at a high level to help relieve the enemy pressure and facilitate the withdrawal of ARVN forces. There were 788 helicopter gunship sorties, eleven B-52 missions dropping 921 tons of bombs and 157 tactical air sorties which destroyed 37 enemy vehicles and one field gun and damaged 18 other vehicles.

During the night of 21 March, the 1st Armored Brigade and the 1st and 8th Airborne Battalions left their positions along Route No. 9 and moved east through the jungle in search of a point to cross the Xepon River. Successful in avoiding enemy contact, the convoy of nearly 100 vehicles meandered through the dense jungle until about noon the next
